Insight Platform

Data Validation | Bulk Mods | PMR & GMR | Closeout | Accelerator

Increase productivity and compliance across your organization.

Unison Insight

The Unison Insight Platform provides advanced, unrivaled intelligence, collaboration, and data integrity to acquisition and financial assistance professionals. Using the latest data-mining, AI, and RPA technologies, it enables powerful reporting and analytical capabilities.

Unison Data Validation

Adding the capabilities to manage validation by administrators puts the power in the hands of agencies to drive policies and procedures.

Unison Bulk Mods

Bulk Mods automates the time consuming process of administrative type modifications to awards and grants in a bulk process.

Unison PMR & GMR

Procurement & Grant Management Review is a robust set of tools which supports activities from organizing the review through execution and remediation.

Unison Closeout

Using the power of technology, acquisition and financial assistance professionals can account for and free-up funds quickly, allowing them to focus their attention on complex closeouts and other strategic work.

Unison Accelerator

A collaborative workspace where program and technical leaders partner with acquisition and financial assistance professionals to improve the lead time and accuracy of their acquisition/grant plans and packages.

“ This new technology allows those professionals to gain weeks back each year by removing the monotonous steps required today.”

- Reid Jackson, Unison CEO
